GREEN ENVIRO WAX

A 100% readily biodegradable clear coat wax and drying agent for use in automatic and manual car washes. It imparts long lasting shine and water repellency to automobile surfaces. This wax readily bonds to vehicle surfaces and displaces water through sheeting action, greatly increasing drying efficiency through the blower. This innovative product is formulated with natural biodiesel rather than poorly biodegradable mineral oils.

DIRECTIONS:
Dilute wax 1:200-1:300 with water as a starting point. Adjust concentration for performance as necessary. Follow wax with a spot-free rinse for best results.
