TECHNICAL DATA SHEET

D326

VERSATILE DEGREASER

This versatile alkaline degreaser is non-caustic and solvent-free, yet is powerful enough to quickly penetrate and remove greasy soils from heavy duty machinery. It is formulated with a premium blend of biodegradable surfactants and emulsifiers that produce a viscous clinging foam to maximize dwell time and cleaning.

Water conditioners make this product highly effective in both hard and soft water conditions and readily remove road salts from vehicles. This mild degreaser is of low toxicity and is fully biodegradable, making it safe for workers and the environment. It is gentle on hands and is safe to use on all painted surfaces, soft metal parts, glass, plastic, rubber and concrete.

DIRECTIONS:

Pressure Washing / Presoak / Detergent
Dilute product 1:100 – 1:200

Foam Cannons / Foam Brush Applications
Dilute product 1:50 – 1:100

Use hot water for best cleaning results.

COMMERCIAL USE ONLY
