

F378

TECHNICAL DATA SHEET

A – LIN ALKALI CIP CLEANER NF

This product is a concentrated non-foaming alkaline CIP cleaner designed for use in dairy plants. The strong alkaline nature of the product makes it excel at removing proteins and fats. It is formulated for *in-place* cleaning of farm pipelines, bulk tanks, and automatic milking systems.

DIRECTIONS:

Pre-flush with cold potable water to remove any milk or loose butterfat in the system.

Make a solution of alkaline cleaner using 0.5% (5mL/L) A – LIN Alkali CIP Cleaner NF diluted with warm (70-80°C) water and circulate for 10 minutes. This will remove any residual fats or proteins remaining. Follow this wash with a thorough rinse with warm water to remove detergent from the system.

Following the alkaline cleaning, acid wash to remove mineral scale.
