

J416

TECHNICAL DATA SHEET

FRYER CLEAN

This product is a concentrated granular cleaner for boiling out stainless steel fryers.

DIRECTIONS:

Drain all oil and food particles from fryer.

Fill the fryer about 3/4 full with warm water.

Add 225 g (8 oz) of this product slowly and let the water boil.

Let simmer 15 - 20 minutes.

Drain the solution from fryer.

Rinse out all residue.

Neutralize with a solution of vinegar and water.

CAUTION: This product contains caustic soda. Avoid prolonged and repeated contact with aluminum.
