HYPER CLEAN

CLEANER-SANITIZER-DISINFECTANT
KILLS 99.99% OF FUNGI, BACTERIA AND VIRUSES
GUARANTEE: hydrogen peroxide – 6.9% w/w

D.I.N. 02511940

Hyper Clean is a hydrogen peroxide based cleaner, sanitizer and disinfectant with bleaching and deodorizing properties. It is intended for use in commercial settings such as institutions, hospitals, and food processing areas.

It is a fully biodegradable product with environmental benefits not normally found in cleaning compounds. It is a mild yet effective cleaner that provides superior cleaning properties, and the hydrogen peroxide breaks down to form water and oxygen, leaving minimal chemical residue.

SANITIZATION AND DISINFECTION: For use as a sanitizer or disinfectant on hard, nonporous surfaces only. For heavily soiled surfaces, a pre-cleaning step is required. Use 80 mL per L of water (5111 ppm in-use concentration). Apply with a cloth or mop. Allow surface to remain wet for 10 minutes, then remove excess liquid. Prepare a fresh solution for each use. Rinse and allow to dry. When used on food equipment or food contact items, completely drain the product from all food contact surfaces and rinse with potable water. Avoid contamination of food.

CLEANING: It is suitable for a variety of cleaning applications including laundry, washrooms, windows, floors, walls and ceilings. It is also ideal for carpet stain removal and as a non-acid bowl cleaner. Hyper Clean can be used undiluted for tough jobs or diluted up to 10 mL/L for light duty cleaning.
