

J824

TECHNICAL DATA SHEET

EXTRACTION LIQUID PLUS

This product is a concentrated blend of chemicals designed to dissolve and remove heavy grease and soil deposits from commercial and residential carpets.

It meets the specifications for use on stain resistant carpets, and mixes readily in hot or cold water. It is low foaming, contains corrosion inhibitors and optical brighteners, and is designed for use in both truck mount and portable extractors.

DIRECTIONS: Truck Mounts: dilute 1 litre in 20 litres of water to make a truck mount concentrate. For extra heavy soil, mix at 1.5 L per 20 litres of water then use in chemical injection systems.

Portable Machines: dilute 2 ml/L of hot water. For very heavy soil and commercial carpets dilute 3-4 ml/L in hot water. Dilution will vary with cleaning application.

NOTE: Test carpet for colour fastness before using.
