

L507

TECHNICAL DATA SHEET

LAUNDRY ALKALI

This product is a highly alkaline free-flowing powdered washing compound that includes active alkaline builders and detergent properties. It is designed specifically as an excellent alkali source to be added to laundry detergent for heavy duty washing operations. It is ideal for food plant use.

DIRECTIONS FOR USE: Add enough to keep the pH at 11.5 on the break. See your local representative for detailed recommendations for your washing operation. Always use Laundry Sour in the rinse cycle when adding Laundry Alkali to the wash cycle.
