

R539

LIQUID RIG WASH

This product is a non-phosphate biodegradable liquid cleaner and degreaser designed for a variety of cleaning jobs encountered in the oil field. Liquid Rig Wash should be used with hot water for best results, and can be applied with high pressure washing equipment.

It contains emulsifiers, surfactants and water softening agents. Liquid Rig Wash has a pH of 10-11 and is safe to use on clothing and painted surfaces. The surfactants and emulsifiers used are fully biodegradable.

DIRECTIONS:

For most cleaning jobs, use 1:50 to 1:80 parts of water. Adjust the amount of cleaner used as required. For heavy duty degreasing, use 1:5 to 1:20 parts of hot water.
