

T608

POWDERED ROLLER CLEANER

This product is a heavy-duty low-foaming alkaline cleaner ideally suited for use in food plants and other industrial applications. This product may be used in meat and poultry packing plants to clean rollers, hooks, trolleys, tables and carts, areas where excessive grease, fat and rust are encountered. Avoid contact with aluminum and other soft metals.

DIRECTIONS: For removal of light soil and rust, use 2-4 oz./gal of water (1.25 – 2.5% solution). For de-rusting hooks and trolleys, use 10-16 oz./gal of hot water (6 - 10% solution). Hooks and trolleys should be immersed for 10-15 minutes, longer if necessary, then rinsed and dipped in a mineral oil based chain lubricant bath to prevent rusting.

CAUTION: Contains caustic soda.
