LIQUID HOG SCALDING COMPOUND

This product aids in loosening hair on pork carcasses during the scalding process. It is ideal for use in registered meat packing facilities.

DIRECTIONS: Dilute product at the rate of 12 litres per 22,750 litres (2.5 gallons per 5000 gallons) of hot (60°C) water in the hog scalding tank. Add 10 - 15 litres every 8 hours to keep solution at full strength.

All hog carcasses should be thoroughly rinsed with potable water after scalding bath.
