## WET-TECH LAUNDRY DETERGENT

This modern, all purpose, wet-washing laundry detergent is free of fragrance, dye and optical brighteners. It has a pH close to that of natural fibers and human skin. When used in a gentle wash cycle, dry-clean only garments can be laundered using a “wet clean” process.

Wet-Tech Laundry Detergent is safe for use on silk, wool, cotton, linen, and other delicate textiles. It is powerful enough to remove the toughest soils, pH adjusted to prevent damage and colour loss, and safe for use in all wet-cleaning and washing machines. Wet-Tech Laundry Detergent is compatible with commercial laundry additives such as alkalis, penetrating agents, and bleaches.

**DIRECTIONS:** Use 4-8 oz. (120-240 ml) per 50 lbs (23 KG) of dry fabric depending on soil conditions. Use cold, warm, or hot water and wash the items with the appropriate agitation for the durability of the garments for 6-9 minutes, prior to rinsing and extracting. Follow all garment care label instructions.
