

Advantages of Becoming an Ostrem Chemical Distributor

Private Label

We encourage all of our customers to distribute private-labelled products. When your customer runs out of product, they will call you as opposed to another distributor, thus greatly increasing the likelihood of getting repeat business. We have a graphic design department that can help develop a unique label that accurately represents your company.

Growing your Brand

Our sales team and graphic design department can help develop marketing content to present to your customers.

Product Selection

Take a look at our product categories to give you an idea of the various markets our products serve. Our sales staff can help narrow down product selection from our vast product offering.

Ongoing Service and Support

Our customer services include identifying solutions to unique cleaning challenges, product selection, support, product development and product improvements.

Competitor Identification

While Ostrem Chemical has several distributors in Western Canada, there is plenty of business that we, and our existing distributors do not have. We can help identify the competitive landscape in your location(s). There is always demand for the types of products we manufacture.
