

High Temp Dishwasher

Wash Cycle

OR

- J430**
E-20 Non-Chlor Machine Dishwash
- Ideal for most establishments.
 - Well suited for hardwater areas.

- J429**
E-5 Liquid Machine Dishwash
- Chlorinated.
 - Ideal for establishments where more "whitening" is required. (coffee stains, pasta kitchens, pizzarias, etc.)

Rinse Cycle

OR

- J433**
Glass Brite
- Contains mild acid to prevent hardwater scale buildup.
 - Reduces rinse water surface tension to provide rapid "sheeting" for spot-free rinse.
 - Most concentrated.

- J441**
All Temp Rinse
- Contains mild acid to prevent hardwater scale buildup.
 - Reduces rinse water surface tension to provide rapid "sheeting" for spot-free rinse.
 - Concentrated.

*Sanitizer not required as rinse temperate reaches 180°F or higher

Low Temp Dishwasher

Wash Cycle

OR

- J428**
Low Temp Machine Dishwash
- Non-chlorinated.
 - Designed for use in Low Temp Dish Machines.
 - Well suited for hard-water areas.

- J429**
E-5 Liquid Machine Dishwash
- Chlorinated.
 - Ideal for establishments where more "whitening" is required. (coffee stains, pasta kitchens, pizzarias, etc.)

Rinse Cycle

* Low Temp Machines Have A 2-Product Rinse Cycle *

1 - Rinse

OR

- J433**
Glass Brite
- Contains mild acid to prevent hardwater scale buildup.
 - Reduces rinse water surface tension to provide rapid "sheeting" for spot-free rinse.
 - Most concentrated.

- J441**
All Temp Rinse
- Contains mild acid to prevent hardwater scale buildup.
 - Reduces rinse water surface tension to provide rapid "sheeting" for spot-free rinse.
 - Concentrated.

2 - Sanitizer

OR

- J437**
6% Liquid Chlorine Sanitizer (Bleach)
- Less concentrated.
 - Less expensive but customer will use more.

- J436**
12% Liquid Chlorine Sanitizer (Bleach)
- More concentrated.
 - More expensive but customers will use less.

*Sanitizer is required as rinse temp only reaches 160°F

Bar Glass Dishwasher

Wash Cycle

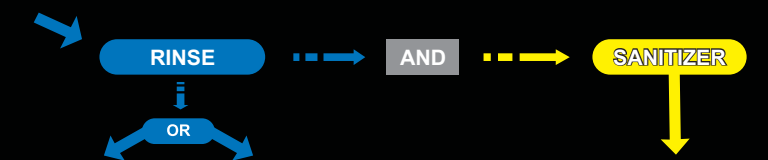

OR

- J440**
E-8 Non-Chlorinated Liq. Bar Glass Cleaner
- Non-chlorinated.
 - Specifically designed for use in bar glass washers.

- J428**
Low Temp Machine Dishwash
- Non-chlorinated.
 - Designed for use in Low Temp Dish Machines.
 - Well suited for hardwater areas.

Rinse Cycle

If it has a 2-pump rinse:

- J433**
Glass Brite
- Reduces rinse water surface tension to provide rapid "sheeting" for spot-free rinse.
 - Well suited for hardwater areas.
 - Most concentrated.

- J441**
All Temp Rinse
- Contains mild acid in addition to wetting and drying agents to prevent hardwater scale buildup.
 - Ideal for high or low temp machines.
 - Concentrate.

- J436**
12% Liquid Chlorine Sanitizer (Bleach)
- Effective sanitizer.
 - If used alone can leave water spotting.

If only 1-pump rinse:

- J438**
K-13 LF Ostro Dine
- Low foaming.
 - Excellent sanitizing.
 - Provides effective rinsing eliminating any scale and hardwater spotting.

*Sanitizer is required as rinse temp only reaches 140°F
